React Flow

- Led React 18 migration across 28 modules in 7-day sprint for Microsoft distribution
- Sole frontend architect — own all UI architecture, design decisions, and delivery
- Built SaaS subscription system: Stripe, SSO, multi-tenant admin-user hierarchy
- Developed real-time chat interface rendering 1,000 data points via D3.js charts, tables, markdown

- Reduced page load by 40% via React.lazy, memoization, eliminating re-renders
- Implemented pagination, virtual scrolling, error boundaries, skeleton loading, permission-based UI
- Designed workflow dashboard with React Flow for real-time task visualization
- Created marketplace feature shipped to production
- Shipped React Native mobile app (iOS + Android) in 3 months
- Mentored 3 junior engineers through code reviews and pair programming

Enterprise clients: **Morgan Stanley, Affinity**

Partnership: **Product prepared for Microsoft distribution**

Application Development Analyst

 **Accenture**

📅 Oct 2018 - Jul 2021

📍 Pune, India

Python Pandas Selenium Flask Automation Data Quality

- Automated address validation for 1.2M records across 195 countries (400% throughput increase)
- Python Scripting Subject Matter Expert — enhanced data quality solution by 96%
- Built location-analytics reporting system for global research parks

🏆 **Apex Award for Innovation • BT Spark Award**

Projects

A selection of projects showcasing my technical expertise

enterprise

ChatCDPai

Sole Frontend Architect

Multi-tenant AI SaaS product for enterprise data analytics

- Real-time chat UI with streaming responses
- 1000+ data point rendering via D3.js
- Multi-tenant theming and admin hierarchy

React 18 Redux D3.js SSE Stripe +2

Enterprise product (no public link)

personal

Bio Maker

Biodata builder for Indian matrimonial profiles

- 200+ biodatas generated
- Sub-2s mobile load time
- PDF export functionality

Next.js TypeScript Tailwind CSS jsPDF
