Jersey City, NJ | 201-993-4276 | pratikpatilui@gmail.com | linkedin.com/in/pratik-patil-dev | github.com/pratikpatil-ui

SUMMARY

Software Engineer with 7+ years of experience, specializing in frontend development. Sole frontend architect at BDIPlus — I own UI architecture, design decisions, and product delivery for ChatCDP.ai, a multi-tenant AI SaaS product. Led a 28-module React 18 migration, designed complex data visualization workflows with D3.js, and collaborate directly with leadership on product direction.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SQL

Frontend: React 18, Redux, Next.js, Material-UI, React Flow, D3.js, React Native

Backend / APIs: Node.js, Express, REST APIs, GraphQL, Stripe API, SSO Integration

Testing: Jest, React Testing Library

Data & Visualization: D3.js, React Flow, Virtual Scrolling, Pagination, Data Grids

Infrastructure: Firebase, Redis, MongoDB, PostgreSQL, Git, Webpack, CI/CD, Postman

Cloud: AWS, Azure (AZ-900 Certified), GCP

Practices: Performance Profiling, Component Architecture, Responsive Design, Accessibility (WCAG 2.1), Multi-Tenant Architecture, Feature Flags, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer III (Frontend) | BDIPlus (ChatCDP.ai) | New York City *Jul 2022 – Present*

- Led the frontend migration of ChatCDP.ai from legacy UI to React 18 within a 7-day sprint, reorganizing 28 modules with config-driven routing, feature flags, and tenant-specific theming for a multi-tenant SaaS product.
- Designed the SaaS onboarding and subscription experience across 4 pricing tiers: signup flows, Stripe checkout, SSO authentication, and a tenant-aware admin-user account system, working closely with leadership on product requirements.
- Developed the core chat interface using Redux and Server-Sent Events, rendering up to 1,000 data points per query through D3.js charts, data tables, and markdown responses with virtual scrolling for large result sets.
- Optimized page load time by 40% using Chrome DevTools and Lighthouse, implementing React.lazy code-splitting, component memoization, and eliminating unnecessary re-renders to meet Core Web Vitals targets.
- Implemented pagination, skeleton loading states, error boundaries, and permission-based UI rendering across 6 product modules, improving reliability for complex data-heavy workflows.
- Created an interactive workflow dashboard using React Flow for real-time task visualization, improving team productivity by 30%, and a marketplace feature — both shipped to production after stakeholder demos.
- Shipped a cross-platform React Native mobile app for iOS and Android within 3 months, owning the full product lifecycle from architecture to App Store deployment while mentoring 3 junior engineers.

Application Development Analyst | Accenture | Pune, India *Oct 2018 – Jul 2021*

- Automated address validation for 1.2M records across 195 countries using Python (Pandas, Selenium, Flask), increasing processing throughput by 400%.
- Drove efficiency as Python Scripting Subject Matter Expert, enhancing the data quality solution by 96% and reducing processing time through automation of manual workflows.
- Streamlined reporting by creating a location-analytics system covering all global research parks, enabling location-wise insights for stakeholders across 195 countries.
- Recognized with two company-wide awards for contributions to automation, process improvement, and risk mitigation planning alongside program managers.

PROJECTS

Bio Maker | bio-maker-in.vercel.app

- Deployed a production biodata builder with Next.js, TypeScript, and Tailwind CSS — mobile-first responsive design, client-side PDF export via jsPDF, sub-2s page load, 200+ biodatas generated.

TULSEE | Real-Time Collaboration Platform

- Engineered a real-time collaboration platform with React, Redux, Next.js, Node.js, Socket.IO, and Firebase featuring group chat with E2E encryption, Zoom API integration, and Google SSO.

EDUCATION

M.S. Computer Science | Stevens Institute of Technology, Hoboken, NJ *GPA: 3.8 / Dec 2022*

B.E. Information Technology | University of Pune, Pune, India *GPA: 3.7 / Jun 2018*

CERTIFICATION

Microsoft Certified: Azure Fundamentals (AZ-900)
